

ABSTRACT OF THE DISCLOSURE

A financial asset manager peer group information dissemination method, system and computer-readable medium therefor is provided. The method includes accessing a database, entering asset manager data in a section of an asset manager questionnaire, the asset manager questionnaire including a plurality of sections. The method further includes sorting, in the database, entered asset manager data from the questionnaire, comparing asset manager data with data of at least another asset manager, and generating a manager report of the compared data corresponding to the plurality of sections for the asset manager and the at least another asset manager.
